

Vascular Anomalies 2030: India

With Interdisciplinary case discussions

Harold Varmus Auditorium,

7th Floor, Mazumdar Shaw Medical Centre Narayana Health City, Bangalore – 99 The Vascular Anomalies Center (VAC) at Boston Children's hospital, a teaching hospital of Harvard Medical School and Mazumdar Shaw Medical Centre of Narayana Health invite you to a joint symposium on Vascular Anomalies.

Vascular anomalies are vessel abnormalities that affect the capillaries, veins, arteries and lymphatics either individually or as a combined lesion and often have a devastating impact on a person's life.

We hope to bring together surgeons, radiologists, pediatricians, general practitioners, hospital management and other stakeholders interested in vascular anomalies for a two-day symposium.

The Symposium offers a platform to share knowledge and experience in Vascular Anomalies diagnosis and management from Boston Children Hospital and Narayana Health.

'Vascular Anomalies 2030: India' begins a long-term goal to improve care for all vascular anomalies' patients across Asia by 2030.1
