TREATING ANIMALS

Gadre clinic has been serving humanity in western Maharashtra for more than four decades. We pioneered exclusive maxillofacial facial practice, when OMF surgery was known as oral surgery and most medical fraternity and public were unaware of the specialty and its role in health care.

Since then, we believed in training budding surgeons in every aspect of oral and maxillofacial surgery including surgical techniques and more so in the philosophy of patient management.

Our fellowship in clinical OMF surgery trains one to be an all rounder and gives a great insight into basic oral surgery to craniomaxillofacial surgery, including microsurgery. From this launching pad one may choose to specialize in super specialty or achieve perfection in general OMF surgery.

We operate all types of minor oral surgery in our clinic under local or sedation local. Major maxillofacial surgeries are performed in multiple major corporate hospitals in Pune City where the director (Kiran Gadre) and Co-director (Pushkar Gadre) are attached. Our aim is optimal functional and aesthetic outcome.

Emergencies are off and on, not regularly. We try to help find accommodation near clinic and your own two-wheeler is desirable.

We expect the candidate to be sincere dedicated, perseverant and eagle eyed.
