

CHANDAN HOSPITAL

Chandan Hospital, a leading multi-specialty hospital in Lucknow, committed to providing comprehensive and high-quality healthcare services. Our facility is equipped with state-of-the-art technology, and our team of highly skilled medical professionals is dedicated to delivering exceptional patient care.

HEAD AND NECK ONCOSURGERY

The newly established **Head and Neck Cancer Unit** in Chandan Hospital marks a significant milestone in the hospital's ongoing commitment to expanding comprehensive oncology services. Although patient inflow is currently modest—as expected in the early stages of a specialized unit—the hospital anticipates a substantial rise in patient numbers as awareness grows and the unit's reputation becomes firmly established in the region. With a focus on excellence in diagnosis, treatment, and multidisciplinary care, the unit is designed to evolve into a leading referral center for complex head and neck cancer cases.

State-of-the-Art Infrastructure

The unit features purpose-built clinical spaces that support seamless patient movement and coordinated care. Dedicated outpatient consultation rooms, minor procedure areas, and a specialized inpatient zone ensure comfort, privacy, and efficient service delivery. The design emphasizes patient-centered care, infection control, and smooth collaboration among surgical, medical, and radiation oncology teams.

Advanced Equipment and Technology

To deliver world-class care, the Head and Neck Cancer Unit is equipped with **up-to-date diagnostic and therapeutic technologies**, including:

- Advanced imaging support such as CT, MRI, and PET-CT (in collaboration with the hospital's radiology department)
- Modern operating suites with precision surgical tools and intra-operative navigation capability

This cutting-edge infrastructure positions the unit to meet rising patient needs while maintaining the highest standards of oncology care. As the unit continues to grow, it aims to establish itself as a center of excellence, delivering comprehensive, compassionate, and technologically advanced treatment for patients with head and neck cancers.

- ❖ Night duties mandatory
